

Cummins-Allison Introduces First U.S. and Canada Market High-Speed Strapper-Ready Tabletop Currency Sorter for the Financial and Casino Industries

APRIL 26, 2011—MT. PROSPECT, IL—Cummins-Allison, the leading innovator and provider of coin and currency handling solutions, today announced the availability of its new “strapper-ready” MPS 4200 currency sorter machine. As the only tabletop currency sorter machine in the United States and Canada to offer an automatic strapping option, the MPS 4200 was designed to satisfy increased productivity demands of multiple environments across the financial and casino industries. The high-performing MPS 4200 reaches a strapper processing speed of 1000 notes-per-minute – making it the highest speed tabletop sorting machine available domestically.

Cummins-Allison President Doug Mennie said, “Businesses are examining solutions that will both improve operational processes and offer a quick return on investment (ROI). We saw a gap in the market where we could advance our technology and develop an affordable, high-performing currency sorter with a strapping capability. The new MPS 4200 provides the automation that businesses are currently looking for—at an attractive price point.”

In addition to processing speed, efficiency and strapper-ready configuration, the MPS 4200 offers flexibility in its software-based customization that other machines do not. Fitness levels can be preconfigured to change at the touch of a button—another time-saving feature when sorting bills for different uses, such as the ATM dispenser or the teller drawer. The sorter also employs sophisticated currency scanning technology to provide the highest level of counterfeit detection available.

“The superior processing speed and automatic strapping options of the new MPS 4200 model improve productivity within the financial and casino industries,” said Curtis Hallowell, Vice President, Product Management. “Customers benefit from the reliability, durability and technical expertise they have come to expect from Cummins-Allison.”
