JetCoin™ Kiosks

Enhance Customer Service and Bring People to your Branch!

Expand your service to accountholders with one of the fastest and highest-performing self-service coin redemption units on the market: the Cummins JetCoin™ kiosk. New business can also be generated as people are attracted to your branch and open new accounts. In addition, your staff is more productive and freed from time-consuming, heavy coin processing — allowing them to handle additional transactions and cross-sell services, contributing towards higher profitability.

Enhanced Customer Service

Easy to Use and the Fastest Sorting Speed in the Industry

JetCoin kiosks boast sorting speeds up to ten times faster than other coin redemption machines. With greater speed and simple operation, the JetCoin kiosk provides your accountholders with a level of service unparalleled among self-service machines. Within seconds, their coins are counted and they take their receipt to your staff for conversion to cash or account deposit.

Increased Staff Productivity

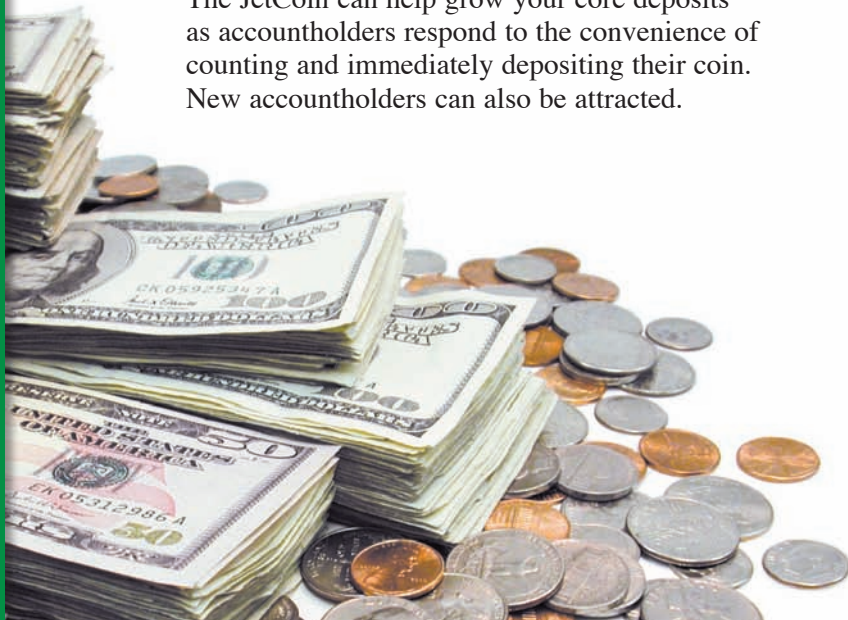

Customers Help Themselves

By letting customers count their own coins, you reduce teller lines and allow your staff to concentrate on more profitable services. Also, the proven durability of Cummins technology, coupled with JetCoin's sizable coin collection capacity, ensures minimal time that your staff will have to attend to the unit.

Revenue Growth Opportunity

Convenience Leads to Revenue

The JetCoin can help grow your core deposits as accountholders respond to the convenience of counting and immediately depositing their coin. New accountholders can also be attracted.

Cummins JetCoin™ Kiosks Provide Benefits For Your Branch Operations

In-House Applications

When switched to attendant mode, your JetCoin can be used to process coins for other in-house needs, such as to recycle coin or balance teller cash drawers.

Minimal Operator Involvement

Various coin collection options provide sufficient capacity to virtually eliminate interruption of customer transactions and reduce the amount of times your staff attends to the unit.

Industry-Proven Reliability

JetCoin kiosks use the same JetSort® heavy-duty coin processing mechanism which is used throughout the world in the most demanding applications, including large cash vaults and armored car services.

Accuracy

JetCoin kiosks boast a 99.995+% accuracy rating.

Tracking

Includes transaction history records for fourteen days, and a rolling day and week total.

Flexibility

These units fit anywhere... against a wall, in a corner, or built into a counter.

JetCoin™ Coin Collection Options:

**Sorted Coins
in Bags**

**Mixed Coins
in Bags**

**Mixed Coins
in Single Bin**

**Mixed Coins
in Dual Bins**

All units can be used with either cloth bags or plastic bags.

Cummins offers a variety of coin collection systems so you can choose the one that's right for you.

Bin Collection System

- **Single Bin** — Coins are counted by denomination and collected using a single, secure bin with a capacity of approximately 60,000 mixed coins - promoting fewer transaction disruptions.
- **Dual Bin** — Coins are counted by denomination and collected in two secure bins with a total capacity of approximately 130,000 mixed coins. When the first bin is full, coins are distributed into the second bin - allowing for maximum uptime.

Bag Collection System

- **Sorted Bag** — Each denomination is counted and sorted into separate bags that require no further processing. Denomination stickers at each bag holder simplify bag management. Dual bagging is available for pennies, nickels, dimes and quarters. Bag capacities vary by denomination (standard Federal Reserve bags).

- **Mixed Bag** — Coins are counted by denomination and then collected in 6 bags of mixed coins. Each bag holds approximately 6,000 coins - combining the convenience of bags with the higher capacity of bins. Both bag collection systems come with exact bag stops, bag warning LED lights above bag holder, programmable bag limits and automatic bag clearing.

Ask your Cummins representative about remote management for the JetCoin.

Reports

Various reports included with the JetCoin provide analysis of the JetCoin kiosk usage as well as operational control. Transaction reports can show real-time daily and weekly totals. Archive transaction reports can be used to assist in machine balancing or settling a customer dispute.

JetCoin™ Kiosks Also Benefit Your Customers

Fast!

JetCoin users appreciate the fastest sorting speed in the industry of 4,000 mixed coins or 6,500 dimes per minute.

Easy!

A touch-screen display guides users through the simple redemption process.

Reliable!

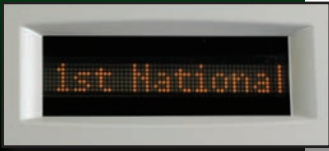

Robust, proven technology provides outstanding accuracy and reliability, ensuring customer satisfaction and repeat visits.

Convenient!

Your accountholders can count their coins at their convenience without waiting in teller lines.

The standard CoinMax backlit sign on the JetCoin Dual Bin machine can be replaced with a scrolling LED light with customizable text.

LOCAL SERVICE & WARRANTY SUPPORT

Cummins is committed to delivering the highest quality products and services. Warranty and maintenance of Cummins products are handled locally, by factory trained, factory direct employees in over 50 North American cities.

Marketing for your JetCoin

JetCoin kiosks are available with eye-catching graphics that demand attention and increase usage. Options include machine panel graphics, posters and backlit headers.

Talk to your Cummins representative for help in selecting the CoinMax graphics package that best meets your needs.

Optional CoinMax sign and cabinet graphics.

Your JetCoin Kiosk can be used for Community Relations

Creativity is your only limit when it comes to potential avenues for community relations involving your JetCoin kiosk. For example, you might donate user fees to charitable causes or local civic organizations -- benefiting the community and generating goodwill.

Lift Tray (option for sorted bag unit only): 15,000 dimes/6,000 quarters

Approximate Dimensions:

Bin Version: 26" W x 24" D x 52" H
Dual Bin Version: 38" W x 31" D x 52" H
Sorted Bag Version: 30" W x 27" D x 41" H
Mixed Bag Version: 26" W x 24" D x 52" H

Power: Voltage operating ranges are either 105-130v or 198-253v. Frequency is 60/50Hz. Customer must provide an electrical supply properly grounded and protected by a circuit breaker in accordance with applicable electrical code. This equipment must be plugged into a properly grounded outlet. To obtain the best results, Cummins recommends using this equipment in conjunction with a dedicated AC power line. Power consumption (full load amps) at nominal voltage: 9.0 Amps (120v); 4.5 amps (220v). Power disruptions that result in input voltage other than the power requirements listed can lead to improper operation of this device or result in failure/damage to electrical components. (Power disruptions are not covered under machine warranty or preventative maintenance agreement.) Power conditioning/stabilizing devices are available through Cummins.
