JetScan™ MPS

Multi-Pocket Currency Sorter

4400 Series

Flexible Configurations to Accommodate any Industry

Program the MPS 4400 to fit your business, not somebody else's...here are just a few ideas:

Banking & Armored Car

Branch Deposit Verification

Verify and strap pre-sorted deposits by configuring 4 pockets for one denomination and one pocket dedicated to off-sorts.

Customer Deposit Processing

Experience non-stop processing by dedicating one pocket to off-sorts and the remaining pockets to process 4 different denominations.

Large Denomination Verification

Verify strap counts and authenticate higher denomination bills, with easy user configuration.

Example:

Pocket 1 - \$100 bills

Pocket 2 - \$50 bills

Pocket 3 - Mixed Denominations

Pocket 4 - Off-sorts

Pocket 5 - Suspect Documents

Unlike competitive models, the MPS 4400 can be configured to avoid the co-mingling of suspect documents with other off-sorted notes.

Vending & Amusement

Bill Acceptor Processing

2 pockets dedicated to \$1, 1 pocket for \$5, 1 pocket for mixed denominations and the final pocket for off-sorts.

Each configuration listed above requires optional configurable side pocket; however, the 5th pocket is not required for configuring a separate suspect document and off-sort pocket.

Greater productivity and throughput with...

1,000 Note Speed

Simultaneously denominates, authenticates, counts, sorts and faces in one pass – all while maintaining the full 1,000 note-per-minute speed.

Suspect Note Detection

Counterfeit detection technology includes magnetic, fluorescence, and ultraviolet sensing.

Sorting Pockets

Five sorting pockets each with a 250 note capacity for high productivity and throughput. (fifth pocket optional)

Configurable Side Pocket Option

An optional 5th pocket offers users increased efficiency and time savings. Each of the five pockets can be configured as an offsort pocket or as an active sorting pocket for one or more denominations.

Continuous Feed Hopper

Automatic continuous feeding with a capacity of 800 notes.

Entry of Non-Currency Items

Non-currency items such as tickets, coupons, gift certificates, checks and coin can be entered manually for complete reconciliation and processing.

JetScan MPS 4400 Benefits:

Vertical Pockets

Vertical Sorting Pockets Provide Maximum Ergonomics

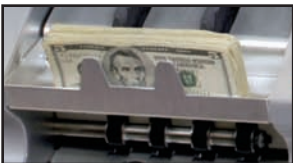

All pockets are visible at a glance and operators can process notes with minimal movement. Currency feed hopper and sorting pockets can even be accessed while an operator is seated.

LED Pocket Alerts

Extreme Sorting Flexibility Combines with Simplicity of Use

Each 250-note capacity pocket can be configured for a specific denomination or, if desired, mixed notes can be directed into one or more pockets. Typically, one pocket is programmed to hold suspect notes or no-calls. LED lights for each pocket alert for strap limits, suspect counterfeits, or error conditions using multiple colors and flashing indicators.

Inline Facing

Double Count Accuracy

Accuracy is ensured as each note is counted and verified twice as it passes through the transport system.

In-Line Facing

All notes are automatically faced, eliminating the need to re-run notes.

Touch Screen

Flow Control Tracking and Diagnostics Ensure Maximum Uptime

Sensors continuously track each note's progress. In the event a note is moved out of place, processing halts immediately and an on-screen diagnostic directs the operator for quick recovery.

Touch Screen for Easy Operation

The LCD flat panel touch screen provides simple operation of the MPS 4400 software, including the ability to quickly transition to different currency handling operations using up to 8 preset, user-defined modes.

Recorded Transactions

Built-In Reporting

All activity and transactions are recorded and provided in easy-to-view reports which can be printed or exported to your database.

JetScanTM MPS

Multi-Pocket Currency Sorter 4400 Series

Specifications

Transport Speed: 1,000 notes per minute

Continuous Feeder: Up to 800 note capacity

Sorting Pockets: 4 pockets (3 sort, 1 offsort), each with a 250 note capacity

Counterfeit Note Detection: Magnetic, Fluorescence, UltraViolet

System Control: JetTouchTM operating software, available in multiple languages

Display: 10.1" LCD touch screen monitor

Diagnostics: Graphical on-screen diagnostics

Printer Compatible: Compatible with thermal or dot-matrix printer

Table: Fixed-height table included (optional shelves available)
Optional adjustable-height table available

Overall Dimensions (including fixed-height table):
36"W x 30"D x 77"H

**Overall Dimensions
(including fixed-height table and configurable side pocket):**
43"W x 30"D x 77"H

Weight (including fixed-height table): 385 lbs. (175 kg)

Power: Voltage operating range is 105-130v. Frequency is 60Hz. Customer must provide an electrical supply properly grounded and protected by a circuit breaker in accordance with applicable electrical code. This equipment must be plugged into a properly grounded outlet. To obtain the best results, Cummins recommends using this equipment in conjunction with a dedicated AC power line.

Power consumption (full load amps) at nominal voltage: 9.0 Amps.

Power disruptions that result in input voltage other than the power requirements listed can lead to improper operation of this device or result in failure/damage to electrical components. (Power disruptions are not covered under machine warranty or preventative maintenance agreement.) Power conditioning/stabilizing is included.

Local Service & Warranty Support

Cummins is committed to delivering the highest quality products and services. Warranty and maintenance of Cummins products are handled locally, by factory trained, factory direct employees in over 50 North American cities.
