

- ✓ Counts and Validates Currency
- ✓ Securely Deposits Cash into a Safe
- ✓ Provides Reports & Audit Trails

The JetSafe™ offers a quick and secure system for processing employee bank deposits.

With the JetSafe system, employees can make quick and secure deposits at any time and as often as needed, without involving other employees or supervisors. Each deposit is accurately counted, tracked electronically and stored securely in a high capacity, UL291 grade safe.

Count, Validate and Secure Funds

The JetSafe is equipped with advanced currency scanning technology, deposits are counted and verified at 800 notes per minute with unsurpassed counterfeit detection. Counted funds are secured in high-capacity locking cassettes that store up to 5,000 notes. Once the cash is counted it is deposited into the safe below - limiting exposure and reducing the risk of theft and loss.

Audit and Report Activity

Every transaction is recorded and tracked through each user's personal ID (read by swipe card* or entered via the touchscreen) providing an audit trail of all activity. Cash is deposited through the JetScan currency scanner, and other media sales such as travelers checks are recorded by the user and deposited into a secure envelope drop. Multiple receipts and reports can be printed including end-of-day activity, cash removal and individual user reports.

* Swipe card is an available option

CUMMINS
