

# JetScan iFX<sup>®</sup> i400 Ticket and Currency Processing Solution

Process tickets and currency faster on a single multi-pocket device

# Running tickets and currency on a multi-pocket device improves productivity

The JetScan iFX® i400 is the fastest, smallest, and most affordable multi-pocket sorter available, enabling casinos of all sizes to improve ticket and currency processing.

Enhancing productivity is a key concern for casinos everywhere, particularly in soft count operations. Managing high volumes of cash and tickets can be very time-consuming unless you have the right equipment. The JetScan iFX i400 offers processing power like no other, running both mixed tickets and currency into multiple pockets without stopping. Combine high speed with the uniquely flexible pocket configurations, and you have a winning combination that delivers game-changing time and money-saving improvements in virtually any casino application.

## Cut currency processing time in half

Casinos are reporting that they have cut their vault operations' currency processing time in half as a result of adding the JetScan iFX i400 to their operations. According to Tachi Palace Casino director of cage and vault, Ruth Ritchie, "We reduced the vault drop count times and number of employees needed by 50% each, saving us time and money."

## High-speed mixed ticket and currency processing on a configurable machine

### Improve productivity and cut costs – a win-win for you

Keeping up with increasing ticket and currency volume is challenging, and you

need solutions that are up to the task. The JetScan iFX i400 scanner can easily handle tickets and cash on the same multi-pocket device, improving efficiency and productivity. Processing and reading mixed tickets and cash in one pass, the JetScan iFX delivers unrivaled time, cost and space savings to your gaming operation. It's the only user-configurable, desktop multi-pocket sorter that processes and sorts tickets and currency in a single pass, in any orientation, all on one device.

### Faster, smaller and more efficient

Casinos everywhere are looking for ways to cut costs without impacting the player experience. In addition, employee retention remains top-of-mind for managers. The JetScan iFX handles large volumes of cash and tickets with unparalleled speed and accuracy, enabling your operation to run at peak efficiency. Industry leading features include:

- 64% smaller footprint than any other multi-pocket currency sorter.
- 39% faster ticket and currency processing reduces employee hours in the soft count room and gets count information to accounting more quickly.
- 1 device handles tickets and currency to streamline operations, simplify employee training, and get the job done faster.

## Designed for gaming operations

Different departments have different needs, and the i400 comes with optional features that can be added later depending on your requirements. You can start with currency-only features and later add ticket processing, streamlining operations and eliminating redundancy. You can also start with as few as 3 pockets and expand to 5, 7 or 9 pockets. The choice is up to you. It's the first solution of its kind and provides peace of mind knowing that the investment you make today can grow as your needs change.

### Bar code reading, sorting, and flat file export

- Process and separate mixed notes from tickets and receive a total count for both media on a single multi-pocket device.
- Process currency and read bar codes at a speed of 1,000 documents per minute.
- Export both ticket and currency flat files to casino systems.

The only configurable, desktop multi-pocket sorter that processes and sorts tickets and currency in any orientation in a single pass.

### Choose from 3 or up to 9 pockets

Configure it as you want it today, confident that you can add pockets for future growth—all in the same amount of space. You can start with as little as 3 pockets and later expand to 5 pockets...or 7 pockets...or 9 pockets in the same compact space. Gaming operations increase processing efficiencies due to high speed, flexible configurations.

### Breakthrough technology: 39% faster

Sorting mixed currency at up to 1,000 notes per minute, the JetScan iFX i400 is 39% faster than its closest competitor. In addition, through the use of patented image-recognition technology, the currency read rate is significantly improved. The bottom line: less stopping, greater productivity, higher throughput. Decades of industry experience and customer feedback drove the development of a powerful yet easy-to-operate product. The One Touch Plus interface is an intuitive operating system that speeds training and makes day-to-day operations simple. Create multiple processing types, enter coin and

non-cash items into batch totals, and accommodate future processing features.

### User-friendly display

A vibrant, full-color, touch-screen display allows operators to change pocket configurations and switch operating modes easily. With no keystrokes to memorize, users are quickly trained and navigation is easy. Screens can be further simplified to only display the buttons an operator needs for daily operation.

### Greater throughput with non-stop processing

JetScan iFX i400 boosts productivity for any property that processes moderate to large amounts of currency. Higher throughput is accomplished first and foremost by the breakthrough imaging-sensor technology at

the heart of the JetScan iFX i400. But high productivity gains are also achieved by:

- A continuous-feed hopper, which holds up to 800 notes and tickets and can be filled as the machine is running.
- A beltless, full-access transport path, which ensures fewer jams and less downtime. When jams do occur, however, strategically-placed doors allow unobstructed front access to the full path.

### Call us today

Let us show you how the JetScan iFX i400 multi-pocket sorter can optimize your organization's ticket and cash processing operation. Our local teams are ready to help you find the right solution.

You define the pocket configurations with 3, 5, 7, or 9 pockets, horizontally or vertically.

# JetScan iFX i400 multi-pocket ticket and currency sorter

## Features

**Configurable pockets:** Basic 3-pocket model (one pocket for off-sort.) Additional 2-pocket modules are added to make a 5-pocket, 7-pocket or 9-pocket system. Pocket modules can be stacked vertically or placed horizontally. Tickets or any denomination can be assigned to any functional pocket, all of which can be fully utilized for sorting or strap preparation. LED indicators provide status information to the operator.

**Operating system:** One Touch Plus offers basic functionality plus the ability to create and save multiple processing types, enter coin and non-cash items into batch totals, create supervisor and operator passwords, and process bar coded tickets.

**Suspect note detection:** Comprehensive set of counterfeit detection sensors that individually and collectively detect counterfeit notes: imaging sensors, infrared, magnetic ink sensors, fluorescence sensors, ultraviolet sensors and IQ™ Sensing Technology.

**Double count verification:** Performs double verification of each note for added accuracy.

## Options

**Counterfeit detection:** Multiple levels of advanced counterfeit-detection technology.

**Printer:** Optional Citizen impact or thermal printers available.

**Peripherals:** External bar-code scanner and external keyboard.

## Specifications

**Adjustable processing speed:** 600, 800 or 1,000 tickets and notes per minute.

**Denominations scanned:** \$1, \$2, \$5, \$10, \$20, \$50 and \$100.

**Currency accuracy:** 99.99+%.

**Exit pocket capacity:** 250 documents.

**Feeder capacity:** 800 documents.

**Dimensions:** Basic three-pocket system: 29" W x 17" D x 15" H.

Each additional 2-pocket module stacked vertically adds approximately 5" in height.

Each additional 2-pocket module positioned horizontally adds approximately 16" in width.

Various combinations of horizontal and vertical configurations are possible. Contact your Cummins representative for exact needs and dimensions.

**Weight:** Basic 3-pocket system: 88 lbs. Each additional 2-pocket module: 18 lbs.

**Interface/communications:** USB, RS232 and Ethernet.

**Display:** 8" color touch screen.

**Power requirements:** 105-253 VAC, automatic switching; 50/60 Hz; FLA: 6A/3A. Use a properly grounded circuit breaker in compliance with applicable local electrical code.
