

JetTouch® Workstation

Streamline cash and ticket management

A complete back-office solution

JetTouch® workstation is a touch-screen PC terminal running JetTouch casino settlement software. The versatile workstation communicates with Cummins Allison currency, check and ticket scanners, as well as coin sorters, providing a comprehensive back-office solution. Reconcile cash, coin, tickets, chips, tokens, checks, and other non-cash media from networked workstations in up to six different operating configurations.

Transaction capture and reporting in a small footprint

JetTouch functionality and compact size make the workstation an ideal solution for the tight spaces often found in gaming operations. At the touch of a button, operators capture and process data according to user-defined settings. Further automate data entry and get reports instantly with optional bar-code scanner and receipt printer.

Features include:

- Save time and effort by automatically collecting data from other workstations
- Work faster and reduce errors by scanning bar-coded items such as batch numbers or coupons
- Manually enter non-cash media types, such as chips and tokens
- Speed transactions with intuitive menus and screen prompts
- Achieve greater accountability by verifying totals using dual-count mode
- See immediate results by running reports on processed totals

Dedicated ticket processing solution

JetTouch supports interfaces to commonly used casino management systems, including Bally's, IGT, NEWwave, Aristocrat, Konami, TableTrac and M-Games (may require additional software).

Maximum efficiency – minimal training

Simple and straightforward operation keeps training to a minimum. Press on-screen buttons to select a configuration, collect data and produce reports. Print or export to host systems for further analysis.

Count ticket-in, ticket-out (TITO) kiosks faster and reduce entry errors – use JetTouch workstation with 2-pocket JetScan® or JetScan iFX® and hand-held bar-code scanner.

Fast, accurate and flexible – assets you'll appreciate

- **Touch-screen menu** is fast and easy to use
- **Data entry** allows up to five fields and a declared total to balance
- **Custom configurations** are user-defined and stored in memory
- **Media entry** is used to record mutilated bills and other non-standard items
- **Reports** allow you to view, print or export totals on demand
- **Internal battery** helps prevent data loss in the event of power failure
- **Blinking LED/audible alarm** indicates switch to battery due to power loss

Customize settings for relevant results:

- Password controls
- Transaction and account information
- Additional media entry
- Reports
- Communications

Supports multiple device options

For comprehensive data collection and reporting, use input and output options:

- **JetScan iFX®** and **JetScan®** currency and ticket scanners
- **JetSort®** coin sorters
- **Hand-held bar-code scanner**
- **Impact or thermal printer**
